Work Experience

OneIMS   Front-End UI Engineer | 2021–Present

- Improved front-end performance of the primary product platform by ~30% through asset minification and JS/CSS refactoring.
- Built reusable UI components aligned with design system standards, reducing new feature development time by 20–35%.
- Implemented accessibility and performance enhancements improving Core Web Vitals and Lighthouse scores.
- Maintained UI consistency and responsiveness across multiple WordPress and Rails properties.

Net Buddies Ltd   Front-End Developer | 2017–2021

- Led front-end development for Vue.js based applications using modular component-driven architecture.
- Improved loading performance through lazy loading, caching strategies, and optimized asset structure.
- Built and maintained custom WordPress websites with improved SEO, responsiveness, and performance standards.

Webnesters   Front-End Developer | 2014–2017

- Developed multiple premium WordPress themes approved on ThemeForest aligned with industry UI/UX and coding standards.
- Built reusable design patterns and component frameworks to improve project delivery speed and consistency.

Astraea Networks   Front-End Developer | 2012–2014

- Developed responsive front-end interfaces for PHP applications and WordPress sites, ensuring consistent cross-browser performance.
